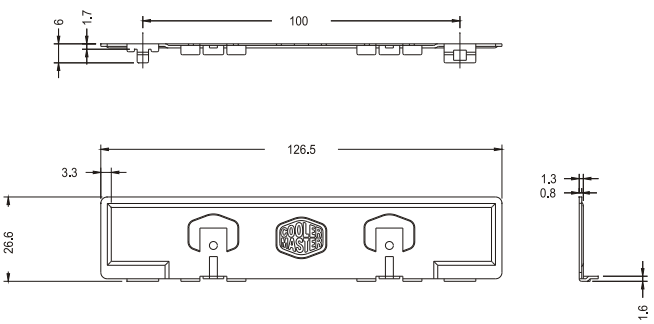
Copper Memory Heat Spreader

PRODUCT RELEASE

Cooler Master Copper Memory Heat Spreader is designed to dissipate access RAM heat, thus improving RAM performance and avoiding system crashes. It is compatible with all standard SDR / DDR SDRM. Its user-friendly design allows for easy and quick installation.

- 100% copper
- Cools down your memory module for consistent performance
- Prevents system crashes from overheated RAM
- Easy installation with spring clips (included)
- High conductivity thermal adhesive tape (included)
- Fits PC100/133 and DDR 266 / 333 / 400 / 433 / 500 memory modules
- Compatible on all brands of SDRAM & DDR RAM



Heat Sink Material	Copper
Dimension	126.5mm x 25.8mm x 0.5mm
Adhesive Tape	High conductivity thermal adhesive tape
Weight	53 g
